

**11-13 JULY 2019**  
9.30 AM-5.30 PM

## CERTIFIED BIM CONSTRUCTION PROJECT MANAGER COURSE

### COURSE SYNOPSIS

Building Information Modeling (BIM) is the current Buzzword amongst the Malaysian Architecture, Engineering & Construction (AEC) Professionals and Project Managers since the government announcement that public projects awarded from 2019 onwards exceeding MYR 100 million are required to adopt BIM in the contracts. Whereas currently many design professionals ie, architects and engineers are familiar in the use of BIM in design, many construction project managers in the client and contractor organizations are not familiar in the usage of BIM in the construction lifecycle particularly at the project initiation and construction management phase. This course outlined the need for construction project managers to be familiar with and able to manage the BIM process across the project lifecycle while collaborating with the design professionals. The course covers the following modules,

- BIM Management and Coordination across project lifecycle
- BIM Execution Plan
- Clash Detection and Analysis
- BIM Project Implementation during Construction Phase
- BIM Case Study for Building and Infra Projects
- BIM Value and Benefits

At the end of the three days course, successful participants will be awarded the **CERTIFIED BIM CONSTRUCTION PROJECT MANAGER CERTIFICATE** by ACPM and Bina-Initiatives Sdn Bhd jointly. The course will be delivered by BIM Experts from Bina Initiatives Sdn Bhd and endorsed by ACPM

### COURSE OBJECTIVES

Cover workflow of BIM in project construction phase, which are:

- Understand the whole BIM process to manage the project life cycle for construction area.
- Exposure to BIM terminology and tools.
- Understand how BIM facilitate or coordinate the design process

### **> LEARNING OUTCOME**

**FAST-TRACK hands-on program to be a CERTIFIED CONSTRUCTION PROJECT MANAGER**

### Who Should Attend

Property Development CEOs, Development Managers, Project Managers, Project Coordinators, Construction Managers, Quality Assurance Managers, Contract Administrators, Document Controllers, Financial Controllers, Engineers, Architects, Quantity Surveyors, Consultants, and building related professionals who want to enhance their career and knowledge in BIM for construction project management

## About ACPM

ACPM is the Malaysian National Professional Association for Construction Project Managers and its Mission is to promote and advance all aspects of project management in construction-related fields covering government agencies, real estate development companies, project management consultancy to civil, mechanical, electrical and infrastructure companies. Its members include experienced personnel from allied professionals in the architectural, engineering and construction industry. It is the only professional body to have Certified Construction Project Managers as its Certified Members, besides ordinary members, associate members and corporate members

## About Bina Initiatives Sdn. Bhd.

Bina Initiatives Sdn. Bhd. is part of South East Asia's largest implementation group of project management systems, providing Project, Portfolio and Risk management solutions for organizations in the architecture, engineering, construction and manufacturing industries. We are headquartered in Petaling Jaya, Selangor, Malaysia. At Bina Initiatives, we strive to help organizations in optimizing resources and the supply chain, reduce costs, manage changes, meet delivery dates and ultimately make better decisions. Bina Initiatives is a leading provider of quality and cost-effective project management and design management solutions where we have the expertise in adopting the best methodology in project management as well as design management processes in any environment. Through experiences we have garnered a strong portfolio of both private sector and public sector clients in the major industries especially in the AEC industry.

**Course Date: 11-13 July 2019 (3 days) Time: 9.30 AM-5.30 PM**

### Training Venue:

**BINA INITIATIVES SDN BHD**

3 Two Square, Suite A-29-06, No. 2 Jalan 19/1, 46300 Petaling Jaya, Selangor, Malaysia

# Certified BIM Construction Project Managers

## BIM Management Training for Construction Project Managers

**Course Outline**

**Course Description:**

Our BIM management courses are based on official training modules from Autodesk, Bentley and Oracle which are then designed towards working with real life BIM projects. This includes imparting the right BIM mind-set and updating the way AEC professionals work in design, manage and collaborate.

**Course Objectives:**

This course is to understand the workflow of BIM in project construction phase and how to value the BIM deliverables to the operations.

**Course Duration:**

Three (3) Days
